

"A World Leader In Customized Dredging Solutions"

EVERY DREDGE **BEGINS** WITH A STORY

TELL US YOURS

AT DSC DREDGE, WE KNOW DESIGNING AND BUILDING THE EXACT CUSTOM DREDGE THAT WILL BOOST YOUR EFFICIENCY AND LOWER YOUR COSTS INVOLVES WORKING WITH YOU AND LEARNING YOUR STORY.

"We've said for years that every dredge has its own story. We work with our customers to discover that story so we can build just the right dredge for their application. Some customers need extreme dredging depths, deeper hulls or increased excavation power. We can make all of that happen."

— Bob Wetta, President of DSC Dredge, LLC

FROM BASE MODEL TO **COMPLETE** CUSTOMIZATION

Marlin Class – Submerged Pump Mining Dredge
Shark Class – Hull Pump Conventional Cutter Suction Dredge
Barracuda Class – Hull Pump Swinging Ladder Dredge
Moray Class – Submerged Pump Swinging Ladder Dredge
Wolverine Class – 10-Inch Cutter Suction Dredge
Badger Class – 8-Inch Cutter Suction Dredge
Custom Class – Purpose-Designed/Built For Your Application

WHAT HAPPENS WHEN YOU BEGIN YOUR STORY WITH DSC DREDGE?

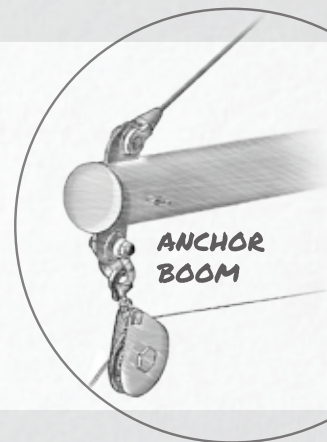

We first learn about your organization and then about your application. We explore all of the details of your project, such as the materials being dredged, length of flow run, depths, discharge point elevation, engine and pump preference and any other relevant information. We involve you in every aspect of building your dredge – from specification and options to manufacture to delivery, training and maintenance.

Once the dredge is built, your story continues when we ship it to its destination. Your dredge typically will be assembled by DSC personnel and placed in service only after we run it through intensive testing. We then fully train your operating staff to ensure they understand the unit and its functions, so they can quickly and competently begin dredging your project.

THE NEXT CHAPTER

Your story does not end with the successful commissioning of a DSC dredge. Each year we offer our Dreducation™ (dredge operator training) courses, either on-site or at the DSC Learning Center in Louisiana. These courses are available in one-day and three-day formats to enable your equipment operators and maintenance staff to become more productive and work more efficiently.

And our dredges are all backed by Parts Express, providing cost-effective parts kits and quick turnaround on parts to minimize potential downtime.

ABOUT US

DSC Dredge's roots go back more than 60 years as a family-owned and -operated dredge design and manufacturing company. During that time, we have custom-built hundreds of dredges in our three manufacturing facilities. Nearly 50 percent of our dredges ship yearly to points across the globe. Our engineering department employs more than 70 years of combined experience in designing custom dredges. And we attribute much of our reputation and success to our many long-term employees – most of whom have spent more than a decade as part of the DSC Dredge team.
