# WORKBOATS

## MULTIPURPOSE SUPPORT VESSELS

At DSC Dredge, we know designing and building the exact custom dredging solution that will boost your efficiency and lower your costs involves working with you and learning your story. DSC Workboats are multipurpose support vessels designed to provide assistance at the dredging site. Our workboats are engineered and built to match the needs of the dredge they will support. Starting with the base model, we customize your workboat for your specific application, learning all details of your project, and involving you every step of the way.

# WORKBOATS

## MULTIPURPOSE SUPPORT VESSELS

Workboats are often called upon for towing, tending dredges, anchor placement, fuel/water transfer capabilities, providing crew accommodations, help in mounting or removal of floating pipes and assisting during repair and maintenance of dredge equipment. DSC Workboats can be custom-outfitted with a full range of options.

### *The Standard Workboats Are Equipped With:*

- Diesel engines for propulsion.
- Hydraulic deck crane on larger models.
- Wheelhouse and ample storage.
- Bow-mounted push knees.
- Stern-mounted tow-bitt.
- Fixed boom with hydraulic winch for raising or moving anchors.
- **Custom features, sizes and designs available.**

#### STANDARD WORKBOAT SPECIFICATIONS

Transportable	Single to multi trucks
Power Source	Diesel engines; HP varies by model
Propulsion System	Single or twin screw options
Crane Style	A-Frame fixed boom with hydraulic winch.

Our customers routinely overcome challenging conditions with tailored solutions. DSC Workboats can be outfitted with a full range of options, including upgrades to the pilot house, crews' quarters, deck cranes and completely original features that may be implemented by request.
