

“A World Leader in Customized Dredging Solutions”

FOR IMMEDIATE RELEASE

DSC Dredge Announces the Launch of its Newly Redesigned Website

RESERVE, LA – We are proud to announce the launch of our redesigned [DSC Dredge](#) website. Our new website features an intuitive and more modern design with easy-to-navigate functionality and content-rich site experience, which will allow our visitors to enjoy a better user experience and get access to essential information related to our core services and capabilities that we have grown to offer over the years.

In the redesigning process our website was created using the latest design elements and technology, keeping in mind compatibility over multiple browsers and mobile devices. Along with providing comprehensive information on ways we can serve our clients, our new website features a dedicated section geared our [latest technologies](#), trends and [partnerships](#).

Speaking to the newly designed website, Bill Wetta, Senior VP of Product Development and Chief Technology Officer, said, *“We are excited to launch the new face of DSC Dredge. Our old website did not represent what we are now capable of as a company. The new website lists a multitude of our technology services and capabilities that we have grown to offer. We believe that this new website will help our visitors to explore our services and capabilities with an informative experience as we continue to grow and expand.”*

Bob Wetta, President and CEO said, *“Delivering solutions around dredging and technology is in itself a complex message to communicate. We hope that our new website helps to clearly articulate what we do; how we do it; and the value which we can bring to our current and future customers.”*

DSC’s Marketing Director Mercedes James added *“our company’s website is part of the ongoing evolution of DSC Dredge and even though our site has launched we are actively fine tuning and*

adding content daily which will include additional helpful information, articles, company announcements and case studies to name a few. We hope visitors find our website not only fresh and modern but informative.”

About DSC Dredge

DSC is a global leader in the dredge manufacturing industry, engineering superior customized dredging solutions to meet specific application needs, while continuing to exceed customer expectations. DSC Dredge designs and manufactures high quality, durable cutter suction dredges. At DSC Dredge, we help customers make THE RIGHT CHOICE. Quality, Innovation, Service, Commitment and Customization are key DSC attributes which explain why customers choose to work with DSC. DSC Dredge operates from two manufacturing facilities located in Reserve, LA, and Poplarville, MS.
